

WG-6 Summary

Presentations in WG6 session

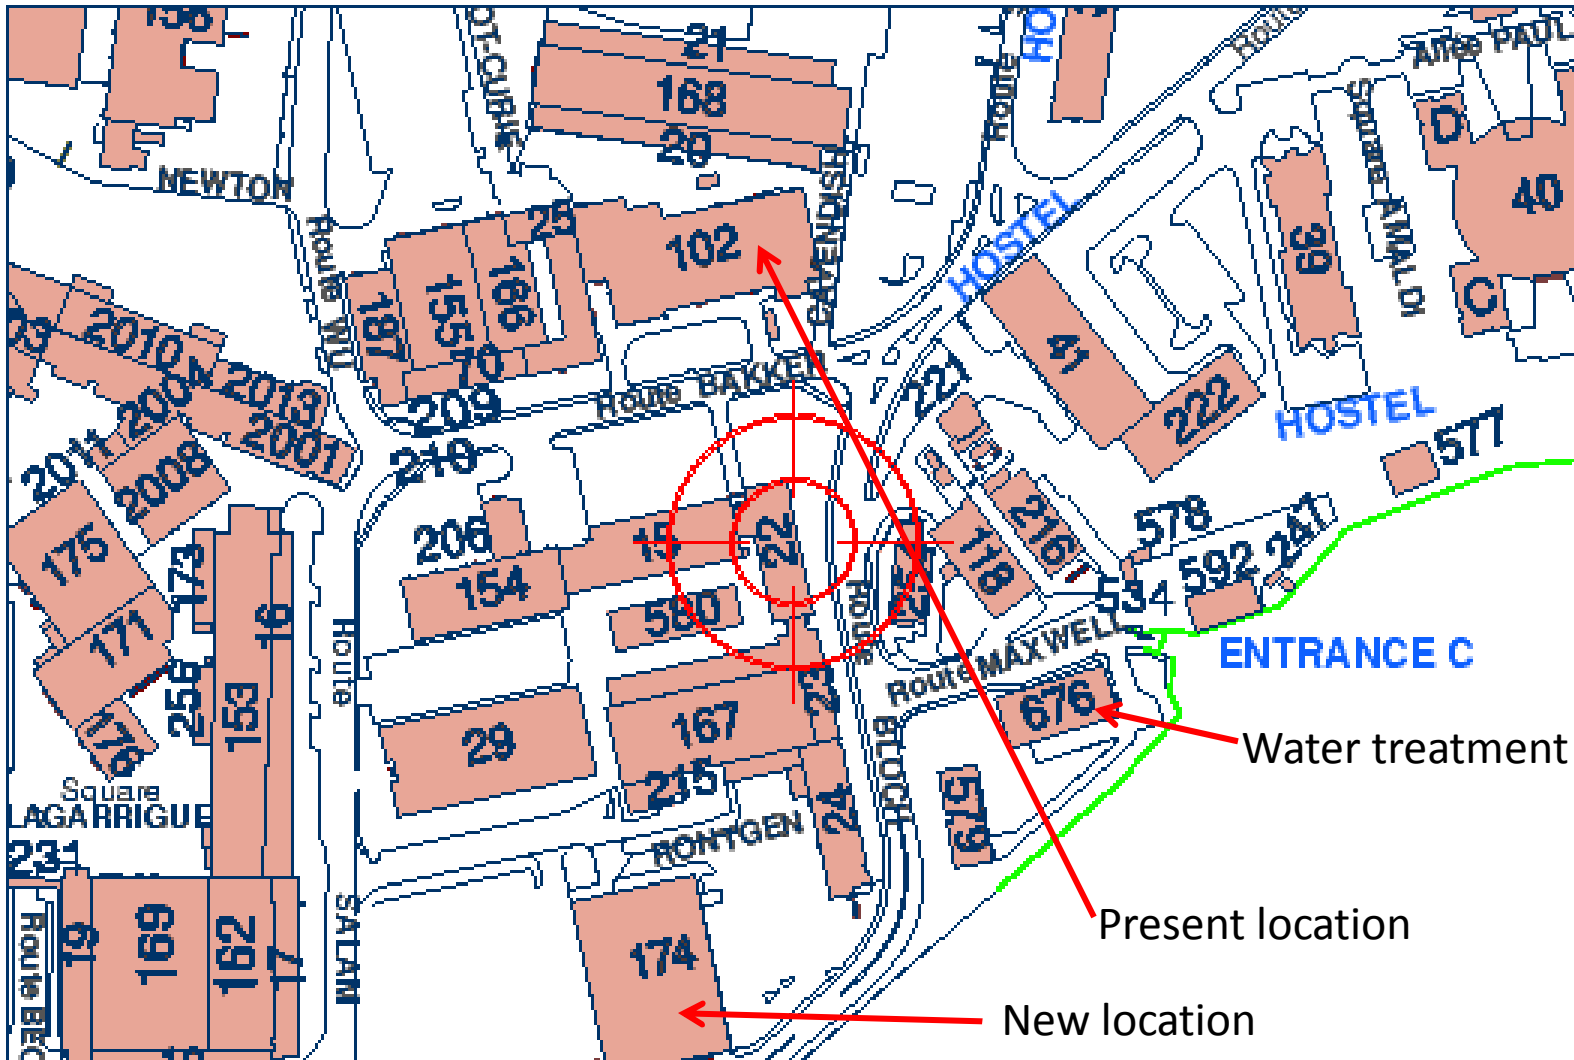

- G.Bopp AG, R.Gasser
- EN-ICE workshop upgrade, H.Taureg
- Interim solution, R. de Oliveira

The G.BOPP AG

- We use their mesh for Micromegas
- They explained what they do and could do
- We are a tiny customer
- We asked many questions
- We learned things
- They may have thought we are crazy
- **They are interested**

EN-ICE workshop upgrade

- New building under design
 - PCB workshop
 - Surface treatment
 - PCB design
 - PCB population workshop
- Time scale
 - About four years

Water treatment plant

Present location

New location

Latest developments

- S.Bertolucci will finance machines to be put into present workshop asap
- This will allow production of large area MPGDs
- 1 m * 2m micromega
- 0.5m * 2m GEM

Details of workshop upgrade

- Rui explained
 - What machines he will install in the present workshop
 - Timescale: be operational end of 2010
