## Rare B Decay potential of SuperB

The study of rare B Decays at SuperB provide unique opportunities to understand the Standard Model and constrain new physics. We discuss the physics potential of such measurements from the proposed SuperB experiment with 75ab-1 of data.

**Primary author:** SUPERB, Collaboration (Laboratori Nazionali di Frascati)

**Presenter:** PEREZ, Alejandro (Laboratoire de l'Accélérateur Linéaire (LAL))

**Track Classification:** 06 - CP violation, CKM and Rare Decays
