A Review of the Mass Measurement Techniques proposed for the Large Hadron Collider

Friday, 23 July 2010 09:00 (20 minutes)

We review the methods which have been proposed for measuring masses of new particles at the Large Hadron Collider paying particular attention to the kinematical techniques suitable for extracting mass information when invisible particles are expected. This talk is, in effect, a companion to a recent review with the same title: <http://arxiv.org/abs/1004.2732> (Barr & Lester)

Primary author: Dr LESTER, Christopher Gorham (University of Cambridge)

Co-author: Dr BARR, Alan James (University of Oxford)

Presenter: Dr LESTER, Christopher Gorham (University of Cambridge)

Session Classification: 10 - Beyond the Standard Model (theory and experimental searches)

Track Classification: 10 - Beyond the Standard Model (theory and experimental searches)
