Commissioning and Performance of the ATLAS Calorimeter Systems with proton-proton Collisions at the LHC

Thursday, 22 July 2010 14:40 (15 minutes)

The commissioning, operation and general performance of the electromagnetic and hadronic calorimeters of ATLAS will be presented, as achieved using random triggers, calibration data, cosmic muons, and LHC proton-proton collisions. Methods will be presented for verifying the precision of inter-channel synchronization and calibration, and their improvement with in-situ data.
